

Qquba

This safe stands out from the rest of our collection primarily in the placement of its touchpad - on the top as opposed to the front panel. This makes it convenient for many users. Thanks to its combination of great looks and security features, this can double up as a bedside table too! Of course, it retains one of our key features - the laser cut design with minimal door gap and high resistance of its double shooting bolts to tools and torching.

Suitable for: Hotels, Homes, Offices, Shops/Supermarkets
